

# MYOB Essentials

## Easy online accounting

## Everything you need to simplify your bookwork

MYOB Essentials is 100% cloud accounting software you can access anywhere you're online.

It's ideal if you want hands-on access to your accounts, but prefer to keep it quick and easy so you can get on with running your business.

### MYOB Essentials is perfect if you:

- + Like some help getting the accounts right
- + Want real time business insight, and the ability to get hands on with your accounts
- + Are looking for quick, simple invoicing, GST and payroll
- + Want an accounting solution that doesn't require much software or accounting knowledge to use.

### Know how your business is doing in real time

MYOB Essentials give you instant visibility of how much money you have in the bank, your expenses, who owes you money and how much GST you need to pay.

### Get help when you need it

Sharing your file with your advisor means they see exactly what you see. So if you need help, they can give you advice on the spot.

### Save time and effort

Have your bank transactions delivered into your MYOB Essentials file with accurate, secure bank feeds. Automatic matching rules can then be set up for regular transactions, like fuel purchases, so they code themselves.

### Take the stress out of staying compliant

MYOB Essentials records all the data your advisor needs to help you meet your reporting requirements for GST and other levies. Secure online storage of your file also helps protect your records against damage or loss.

### Grows with your business

The MYOB Essentials range of accounting software can grow with your business, unlocking features like invoicing and payroll as you need them.
